GENERAL PPWR REGULATORY INFORMATION DECLARATION

Regulation (EU) 2025/40 on Packaging and Packaging Waste

Issuing company: AIRWATEC S.A. | Product scope: Packaging used for CINTROPUR water filtration products and spare parts, as described in the accompanying packaging-specific declarations. | Issue date: 19 October 2026

1. Purpose of this declaration

AIRWATEC S.A. provides this regulatory information statement to support customers and distributors in understanding the PPWR status of the packaging used for CINTROPUR products. On the basis of the packaging-specific declarations and information available to AIRWATEC at the date of issue, the packaging types identified in the annex have been assessed against the PPWR requirements cited in those declarations. This statement does not extend that assessment to unlisted packaging or to requirements for which supporting evidence has not been established.

2. Nature of the document

This is a general regulatory information statement, not an EU Declaration of Conformity within the meaning of Article 39 and Annex VIII of Regulation (EU) 2025/40. Packaging-specific EU Declarations of Conformity are separate documents and remain subject to validation and signature by the responsible economic operator.

3. Basis of information

The information is based on the four packaging-specific AIRWATEC declarations supplied for this dossier and, where available, supplier compliance documentation, technical specifications, material declarations, test reports and internal compliance assessments. The general statement does not certify that all underlying evidence has been independently verified.

4. Documentation and confidentiality

AIRWATEC may hold commercially sensitive supplier information, manufacturing specifications, formulations and test results. Such underlying documents are not automatically disclosed to customers. Requests for supporting evidence may be considered individually, subject to legal requirements, legitimate purpose, contractual commitments, confidentiality and availability. Relevant documentation will be provided to competent authorities as required by applicable law.

5. Roles and responsibilities under the PPWR

The PPWR allocates obligations to manufacturers, importers, distributors and other economic operators according to their role in the supply chain. AIRWATEC assesses its responsibilities for packaging placed on the market with its CINTROPUR products. Each downstream operator remains responsible for obligations applicable to its own activities. This statement does not transfer or waive statutory responsibilities.

6. Customised, modified or repackaged products

Where customers or third parties modify, combine, relabel, refill or reconfigure packaging, the resulting packaging system may require a separate compliance assessment. AIRWATEC's statement is limited to the identified packaging in the configuration described in the underlying declarations.

7. Limits of this declaration

This statement is issued for regulatory information and compliance support. It is not legal advice, regulatory approval, third-party certification, independent verification or an unconditional guarantee of compliance. It does not cover packaging types, materials or downstream uses not identified in the accompanying documentation.

8. Validity and updates

This statement reflects information available on its issue date and may be reviewed following changes to materials, packaging design, suppliers, manufacturing sources, supply chains, technical evidence or applicable legislation, delegated acts, implementing acts, harmonised standards or official guidance.

9. Use and liability

This statement may be shared with AIRWATEC customers and distributors for compliance-information purposes. Each economic operator must independently assess its legal responsibilities, intended uses, specific packaging configurations and any national requirements applicable to its activities.

Annex – Packaging covered by the accompanying declarations

• Cardboard cushioning insert – packaging ID 5425024033837; declaration reference AIRWATEC_PPWR_2026_Carton_Calage; manufactured in Germany.

• Corrugated cardboard box – packaging ID 5425024033820; declaration reference AIRWATEC_PPWR_2026_Carto_Ondulé; manufactured in Germany.

• PE Minigrip bag – packaging ID 5425024033844; declaration reference AIRWATEC_PPWR_2026_Sachet_Minigrip; manufactured in Germany.

• PE bag for activated carbon – packaging ID 5425024033813; declaration reference AIRWATEC_PPWR_2026_Carton_Calage; manufactured in China.
